MidTerm Project Progress Report

Nicholas Teng

MTM6330 Web Production

Section: 010

Professor: Robert L. McKenney

Date: October 9th, 2018

What's Finished:

- The content for the site is all organized
- The nav bar
- Barbones contact page
- Html structure for the homepage, about page and contact page
- Basic css structure of homepage

I used an iFrame from my old assignment from last year. Here is the code for the google maps iFrame:

```
<iframe
src="https://www.google.com/maps/embed/v1/place?q=place_id:ChIJmTsNzRgHzkwR5gxa
W8hFIOc&key=AIzaSyDUFXc-DpGrqqiJ0Rx50fj4jpBHDzrOw0I"
    allowfullscreen></iframe>
```

I took the code for the nav bar we made in class and added anchor tags to them. This is what my nav bar code looks like:
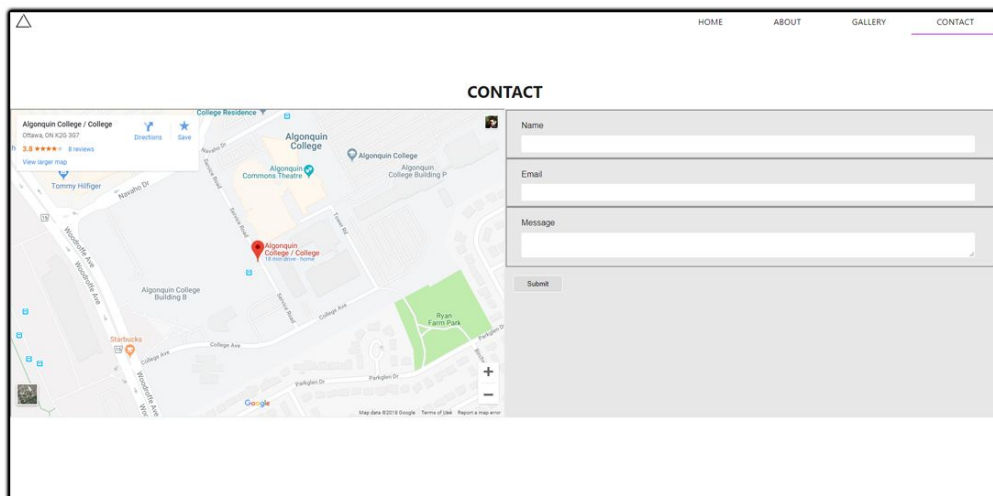

```
<nav class="nav">

    <div class="menu-item"><a href="./home.html">HOME</a></div>

    <div class="menu-item"><a href="./about.html">ABOUT</a></div>

    <div class="menu-item active"><a href="./gallery.html">GALLERY</a></div>

    <div class="menu-item"><a href="./contact.html">CONTACT</a></div>

</nav>
```

What Needs to be Done:

- Grid for the gallery - Completed within 2 days of learning css grids
- Refine contact page - Completed by October 13th
- About page overlay - Completed by October 14th
- Refine homepage scss - Completed by October 13th
- Footer - Completed by October 14th

Problems:

- I do not know how to use css grids yet
- I need to figure out how to overlay items
- I need to figure out how to make icons for the footer
